Claim listing

1. (original) Treatment planning apparatus for an orthodontic patient, comprising:

a workstation having a processing unit and a display;

a memory storing a virtual three-dimensional model of teeth and/or associated anatomical structures representing the dentition of a patient; and

software executable by said processing unit to access said model and display said model on said display;

said software further including navigation tools enabling a user to interactively manipulate said model on said display and simulate the movement of at least one tooth in said model relative to other teeth in said model.

2-38. (cancelled)
